Fall Protection Training (29 CFR 1926.500)

Introduction

In compliance with the Occupational Safety and Health Administration (OSHA) 29 CFR 1926.500 Subpart M regulations, this training is required for Construction workers who work at elevations and their foremen/managers. This course is also eligible for .08 Continuance of Certification (COC) points from the Board of Certified Safety Professionals. This course teaches employees to use fall protection systems in construction settings. Main topics include: the OSHA fall protection standards, fall protection systems, selection of fall protection measures, and inspection and maintenance of fall protection systems.

While this training course is very comprehensive, we highly recommend that additional site-specific training be taken for certain hazardous materials that may be encountered at different sites.
