Lockout/Tagout Training (29 CFR 1910.147)

Introduction

In compliance with the Occupational Safety and Health Administration (OSHA) regulation, this annual training shall be provided for all authorized and affected employees whenever there is a change in their job assignments, a change in machines, equipment or processes that present a new hazard, or when there is a change in the energy control procedures.

Affected employee - employees whose jobs require them to operate or use machinery or equipment that is being serviced or maintained or whose jobs require them to work in areas where service or maintenance is being performed.

Authorized employee - a person who locks out or tags out machinery or equipment in order to perform service or maintenance on that machinery or equipment. The regulation citation is 29 CFR 1910.147 - The control of hazardous energy (lockout/tagout).

The initial or refresher-training course can be taken on-line while complying with the OSHA regulations. OSHA regulations require that an instructor have the minimum education and or experience with hazardous materials to teach this course. It was developed by an accomplished hazardous waste and health and safety professional who possesses a MS in Hazardous and Waste Materials Management and the Certified Hazardous Materials Manager designation, so you can be assured of a quality training program.

If you have any questions while taking this training, please call our HOTLINE at (706) 650-0871.

While this training course is very comprehensive, we highly recommend that additional site-specific training be taken for specific lockout tagout work tasks that may be encountered at different sites.

Table of Contents

Module 1 - Lockout / Tagout Requirements

Module 2 - Injury Prevention

Module 3 - Lockout / Tagout Application and Devices

Module 4 - Lockout / Tagout Procedure

Module 5 - Group Lockout / Tagout Procedure

Module 6 - Final Exam
