National Environmental Trainers® Inc., (NET) was founded in 1996, and provides online environmental health and safety training for use in both the public and private sectors. NET has successfully built its premium brand based on quality, credibility and sensational service.

We offer a complete line of classes to meet your OSHA, EPA and DOT training requirements. We specialize in online environmental, health and safety (EH&S) training for Fortune 50 companies, federal and state regulators (including OSHA), medium to small companies, the federal government and individual professionals. Providing a superior customer experience is a key differentiator for our company, and the explosion of online training has increased the percentage of customer and partner

online interactions. This means that online experiences are replacing classroom training and this trend is rapidly increasing. One will not find a training company today that is a "national classroom trainer".

The market has dictated and continues to do so that online training is the preferred training platform. The quality of the user experience becomes one of the key factors in building and maintaining online relationships. Great user experience has always been the hallmark of the most dominant brands in business. We understand the benefit of great user experiences and we focus our efforts on attracting and retaining online relationships. Also, our exclusive HAZWOPER Hands-on Simulator® has been accepted by OSHA when used in conjunction with site specific training.

All of courses offer Continuing Education Units (CEU's) from the Board Of Certified Safety Professionals (BCSP). Most of our courses offer CEU's from the American Board of Industrial Hygiene (ABIH). We are also an approved PDH provider by the Florida Board of Professional Engineers for all courses.

Courses

- 8-Hour HAZWOPER Annual Refresher Training
- 8-Hour Hazardous Waste Operations and Emergency Response Training for Engineers & Scientists™
- 40-Hour HAZWOPER Initial Training
- 24-Hour HAZWOPER
- 8-Hour HAZWOPER Incident Commander Training
- 8 Hour HAZWOPER Site Supervisor Training
- DOT Hazardous Materials Transportation Labeling and Placarding
- Hazard Communications (HAZCOM) Training
- Mold Remediation Contractor
- OSHA Excavation Competent Person Training
- HAZWOPER First Responder Operations (FRO)
- HAZWOPER First Responder Awareness Training 29 CFR 1910.120(q)
- 16 Hour Upgrade (40 Hour HAZWOPER 29 CFR 1910.120)
- Electrical Safety Training 29 CFR 1926.400 Subpart K
- Asbestos Awareness Training 29 CFR 1926.1101
- RCRA Hazardous Waste Generator Training 40 CFR 262.34 & 262.35
- Personal Protective Equipment 29 CFR 1910.132
- Bloodborne Pathogens Training 29 CFR 1910.1030
- Fall Protection
- Lockout/Tagout 29 CFR §1910.147
- Confined Space Entry Training as per 29 CFR 1910.140
- Laboratory Safety 29 CFR 1910.1450
- 8 Hour HAZWOPER Site Supervisor Training Annual Refresher 29 CFR 1910.120(e)
- HAZWOPER First Responder Awareness Annual Refresher 29 CFR 1910.120(q)
- HAZWOPER First Responder Operations (FRO) Annual Refresher 29 CFR 1910.120(q)
- Lead Awareness for General Industry 29 CFR 1910.1025
- Lead Awareness for Construction 29 CFR 1926.62

Course Descriptions

8-Hour HAZWOPER Annual Refresher Training 29 CFR 1910.120 (available in English and Spanish)

Single Registration: \$125.00 (Group discounts for 3 or more people)

Online Duration: 8 Hours

Prerequisites: OSHA 40 hour or 24 hour HAZWOPER Training

Course Overview: This course is offered in both English and Spanish. The 8-Hour Online Refresher Course meets OSHA requirements for annual refresher training of personnel engaged in hazardous waste operations as outlined in 29 CFR 1910.120(e), including removal or handling of underground tanks and/or piping, contaminated soil and/or groundwater, subsurface investigations, construction work in which hazardous materials may potentially be present, encountered, prepared, packaged, labeled, marked, stored, shipped for disposal, or any facility wherein hazardous wastes are treated, stored, or disposed. The 8-Hour annual refresher is designed to update those who have already successfully completed 24 or 40 Hour HAZWOPER courses.

Online exam upon completion of course.

8-Hour Hazardous Waste Operations and Emergency Response Training for Engineers & ScientistsTM 29 CFR 1910.120

Single Registration: \$125.00 (Group discounts for 3 or more people)

Online Duration: 8 Hours

Prerequisites: OSHA 40 hour or 24 hour HAZWOPER Training

Course Overview: This 8-Hour Online Refresher Course meets OSHA requirements for annual refresher training of personnel engaged in hazardous waste operations as outlined in 29 CFR 1910.120(e), including removal or handling of underground tanks and/or piping, contaminated soil and/or groundwater, subsurface investigations, construction work in which hazardous materials may potentially be present, encountered, prepared, packaged, labeled, marked, stored, shipped for disposal, or any facility wherein hazardous wastes are treated, stored, or disposed. The 8-Hour annual refresher is designed to update those who have already successfully completed 24 or 40 Hour HAZWOPER courses. It is specifically designed for engineers and scientists who want more of a challenge with their annual update training.

Online exam upon completion of course.

40-Hour HAZWOPER Initial Training 29 CFR 1910.120 (available in English and Spanish)

Single Registration: \$495.00 (Group discounts for 3 or more people)

Online Duration: 40 Hours

Prerequisites: None

Course Overview: The 40-hour HAZWOPER course presented totally online by us is one of the most comprehensive Training courses in the industry. With over 100 modules, 8 hours of available video and full audio capabilities, 200 multimedia elements, and the innovative HAZWOPER Hands-on Simulator[®] (OSHA accepted) your students will stay entertained, challenged and informed.

Participants: Personnel who are involved in the following disciplines are required to have initial and recurrent HAZWOPER training: Removal or handling of underground tanks and/or piping, contaminated soil and/or groundwater, subsurface investigations, construction work in which hazardous materials may potentially be present, encountered, prepared, packaged, labeled, marked, stored, shipped for disposal, and for any facility wherein hazardous wastes are treated, stored, or disposed.

Course Descriptions

24-Hour HAZWOPER Initial Training 29 CFR 1910.120 (available in English and Spanish)

Single Registration: \$375.00 (Group discounts for 3 or more people)

Online Duration: 24 Hours

Prerequisites: None

Course Overview: The purpose of this course is to ensure awareness and promote safety among employees who may be exposed to chemical hazards in the work-site. The objective is to ensure that employees operate in the safest possible manner in situations where contact with potentially hazardous materials is likely. The 24-hour HAZWOPER course presented totally online by us is one of the most comprehensive training courses in the industry. With over 70 modules, 8 hours of available video and full audio capabilities, 120 multimedia elements, and the innovative HAZWOPER Hands-on Simulator® your students will stay entertained, challenged and informed. Unlike other on-line courses, we make sure you fully comply with regulatory requirements.

Participants: Personnel who are involved in the following disciplines are required to have initial and recurrent HAZWOPER training: Removal or handling of underground tanks and/or piping, contaminated soil and/or groundwater, subsurface investigations, construction work in which hazardous materials may potentially be present, encountered, prepared, packaged, labeled, marked, stored, shipped for disposal, and for any facility wherein hazardous wastes are treated, stored, or disposed.

Online exam upon completion of course.

8-Hour HAZWOPER Incident Commander Training 29 CFR 1910.120

Single Registration: \$150.00 (Group discounts for 3 or more people)

Online Duration: 8 Hours

Prerequisites: OSHA 40 hour or 24 hour HAZWOPER Training

Course Overview: The 8-Hour Incident Commander Course meets OSHA requirements for training of personnel engaged in the management and oversight of hazardous waste operations as outlined in 29 CFR 1910.120(e), including removal or handling of underground tanks and/or piping contaminated soil and/or groundwater, subsurface investigations, construction work in which hazardous materials may potentially be present, encountered, prepared, packaged, labeled, marked, stored, shipped for disposal, or any facility wherein hazardous wastes are treated, stored, or disposed. This 8-Hour course is designed to certify individuals as Incident Commanders. These individuals must have already successfully completed 24 or 40 Hour HAZWOPER courses.

Online exam upon completion of course.

8 Hour HAZWOPER Site Supervisor Training 29 CFR 1910.120(e)

Single Registration: \$150.00 (Group discounts for 3 or more people)

Online Duration: 8 Hours

Prerequisites: OSHA 40 hour or 24 hour HAZWOPER Training

Course Overview: A new understanding of safety is required at all levels of management from the CEO to the line supervisor. Safety performance is included as part of a site supervisor's overall job evaluation. This on-line course is designed for Site Supervisors and others who manage hazardous material site workers. This information will provide supervisors and managers specific information in order to properly supervise workers, remediate investigations, and oversee other site activities. This training meets the requirements outlined in paragraph "e" of 29 CFR 1910.120.

Online exam upon completion of course.

Course Descriptions

DOT Hazardous Materials Transportation Labeling and Placarding 49 CFR 172.704

Single Registration: \$195.00 (Group discounts for 3 or more people)

Online Duration: 7 Hours

Prerequisites: None

Course Overview: The purpose of this course is to ensure awareness and promote safety among employees who may be involved in the transport of hazardous materials. The objective is to ensure that employees operate in the safest possible manner in situations where contact with potentially hazardous materials is likely. This online course meets DOT requirements for training of personnel engaged in Hazardous Materials Transportation, including hazardous material handling, hazardous waste handling, shipping and manifest documents, proper markings, labels, placards, emergency communication, emergency procedures, and emergency notification.

Participants: This course is intended for individuals who manage hazardous materials in their job. This includes employees who :

- Prepare hazardous materials' shipping papers and/or manifests;
- Prepare hazardous materials for shipping. Handle hazardous materials before, during, and after shipment;
- Handle containers or packaging containing hazardous materials;
- Are responsible for the safety of hazardous materials; and
- Own or operate vehicles that transport hazardous materials.

Online exam upon completion of course.

Hazard Communications (HAZCOM) Training 29 CFR 1910.1200

Single Registration: \$75.00 (Group discounts for 3 or more people)

Online Duration: 1 Hour

Prerequisites: None

Course Overview: Upon successful completion of this course for Hazard Communication training, the student will:

- Learn the use of Material Safety Data Sheets into the routine procedures of working in or around hazardous materials.
- Determine the relevance of appropriate labeling used on containers of hazardous materials.
- Differentiate between various labeling systems used for hazardous materials.
- Apply the use of the MSDS, material's inventory, labeling systems, and the hazardous materials written program into a daily routine in order to have a safer workplace.

Online exam upon completion of course.

OSHA Excavation Competent Person Training 29 CFR 1926.650 Subpart P

Single Registration: \$60.00 (Group discounts for 3 or more people)

Online Duration: 3 Hours

Prerequisites: None

Course Overview: In compliance with the Occupational Safety and Health Administration (OSHA) 29 CFR 1926.650 Subpart P regulations, this training is required for workers and supervisors who work in trenches and excavations.

Online exam upon completion of course.

Course Descriptions

Mold Remediation Contractor

Single Registration: \$250.00 (Group discounts for 3 or more people)

Online Duration: 24 Hours

Prerequisites: None

Course Overview: This course is for individuals seeking certification as a mold remediation contractor. At conclusion of this course, individuals will be issued a certificate of completion as a Mold Remediation Contractor. Individuals must exhibit a proficiency of knowledge required to perform professional mold remediation including:

- Inspection and preliminary determination
- Principles of remediation, qualifications, procedures
- Structural remediation
- HVAC remediation
- Other applicable OSHA regulations.

The guidelines used for development of this training closely follow IICRC S520 "Standard and Reference Guide for Professional Mold Remediation", The New York City Department of Health Remediation Guidelines, the U.S. Environmental Protection Agency, Office of Air and Radiation Indoor Environments Division "Mold Remediation in Schools and Commercial Buildings" and competent industrial hygiene principles. After satisfactorily completing the course, a student will be certified to remove mold contamination from residential and commercial buildings in the U.S. excluding the State of Texas.

Online exam upon completion of course.

HAZWOPER First Responder Operations 29 CFR 1910.120(q)

Single Registration: \$150.00 (Group discounts for 3 or more people)

Online Duration: 8 Hours

Prerequisites: None

Course Overview: In compliance with the Occupational Safety and Health Administration (OSHA) regulation, this 8-hour first responder operations level training is to certify individuals who will be involved with Hazardous Waste Operations and Emergency Response (HAZWOPER). First responders at the operations level are individuals who respond to releases or potential releases of hazardous substances as part of the initial response to the site for the purpose of protecting nearby persons, property, or the environment from the effects of the release. They are trained to respond in a defensive fashion without actually trying to stop the release. Their function is to contain the release from a safe distance, keep it from spreading, and prevent exposures. First responders at the operational level shall have received at least eight hours of training.

Specifically, here are the regulatory citations from 29 Code of Federal Regulations (CFR) 1910.120 section q.

- 1910.120(q)(6)(ii)(A) Knowledge of the basic hazard and risk assessment techniques.
- 1910.120(q)(6)(ii)(B) Know how to select and use proper personal protective equipment provided to the first responder operational level.
- 1910.120(q)(6)(ii)(C) An understanding of basic hazardous materials terms.
- 1910.120(q)(6)(ii)(D) Know how to perform basic control, containment and/or confinement operations within the capabilities of the resources and personal protective equipment available with their unit.
- 1910.120(q)(6)(ii)(E) Know how to implement basic decontamination procedures.
- 1910.120(q)(6)(ii)(F) An understanding of the relevant standard operating procedures and termination procedures.

Online exam upon completion of course.

Course Descriptions

HAZWOPER First Responder Awareness Training 29 CFR 1910.120(q)

Single Registration: \$85.00 (Group discounts for 3 or more people)

Online Duration: 4 Hours

Prerequisites: None

Course Overview: In compliance with the Occupational Safety and Health Administration (OSHA) regulation, this 4-hour first responder awareness level training is to certify individuals who will be involved with Hazardous Waste Operations and Emergency Response (HAZWOPER). This training is for individuals who respond to releases or potential releases of hazardous substances as part of the initial response to the site for the purpose of protecting nearby persons, property, or the environment from the effects of the release. They are trained to notify appropriate organizations without actually trying to stop the release. Their sole function is to notify organizations or appropriate personnel at their facility of a hazardous material spill or release. First responder awareness level personnel shall have received at least four hours of training.

Online exam upon completion of course.

16 Hour Upgrade (40 Hour HAZWOPER 29 CFR 1910.120)

Single Registration: \$225.00 (Group discounts for 3 or more people)

Online Duration: 16 Hours

Prerequisites: 24 hour HAZWOPER Training

Course Overview: The purpose of this course is to ensure awareness and promote safety among employees who may be exposed to chemical hazards in the work-site. The objective is to ensure that employees operate in the safest possible manner in situations where contact with potentially hazardous materials is likely. The 16 hour upgrade course presented totally online by us is one of the most comprehensive training courses in the industry. With over 70 modules, 8 hours of available video and full audio capabilities, 120 multimedia elements, and the innovative HAZWOPER Hands-on Simulator® your students will receive high quality instruction.

Participants: Any student(s) who has a current 24 hour HAZWOPER certification and wants to upgrade to a 40 hour HAZWOPER certification.

Online exam upon completion of course.

Electrical Safety Training 29 CFR 1926.400 Subpart K

Single Registration: \$60.00 (Group discounts for 3 or more people)

Online Duration: 3 Hours

Prerequisites: None

Course Overview: In compliance with the Occupational Safety and Health Administration (OSHA) 29 CFR 1926.400 Subpart K regulations, this training is required for construction workers who may use extension cords, electric tools, etc. This course provides an overview of basic electrical safety for construction workers with little or limited training or familiarity with electrical hazards.

Online exam upon completion of course.

Asbestos Awareness Training 29 CFR 1926.1101

Single Registration: \$125.00 (Group discounts for 3 or more people)

Online Duration: 2 Hours

Prerequisites: None

Course Overview: In compliance with the Occupational Safety and Health Administration (OSHA) regulations, all maintenance, custodial and installation workers are required to receive Asbestos Awareness Training annually. The training covers the health effects of asbestos, types, recognition of damaged or deteriorated Asbestos Containing Materials (ACM), work practice requirements to avoid disturbance of ACM and proper response to fiber release episodes. The asbestos awareness training course can be taken on-line while complying with the OSHA regulations. It is designed to inform employees who may work in buildings that contain asbestos about the hazards associated with asbestos.

Online exam upon completion of course.

RCRA Hazardous Waste Generator Training 40 CFR 262.34 & 262.35

Single Registration: \$170.00 (Group discounts for 3 or more people)

Online Duration: 3 Hours

Prerequisites: None

Course Overview: In compliance with the U.S. Environmental Protection Agency (EPA) regulations, this annual training is for individuals who deal with or manage hazardous waste. The annual training course can be taken on-line while complying with the EPA regulations.

Course Objectives: Identify regulatory requirements for generators of hazardous waste.-Define hazardous waste and its characteristics.

- State requirements for storage of hazardous waste.
- State requirements for other types of hazardous waste.
- State requirements associated with hazardous waste emergencies and spill response.
- Identify requirements associated with shipping hazardous waste from your facility.
- State requirements associated with used oil and oil waste.
- State hazardous waste requirements associated with used batteries.
- Complete hazardous waste exercises.

Online exam upon completion of course.

Personal Protective Equipment 29 CFR 1910.132

Single Registration: \$50.00 (Group discounts for 3 or more people)

Online Duration: 2 Hours

Prerequisites: None

Course Overview: This course identifies the types of PPE available, proper use and maintenance of PPE, as well as manager and Employee responsibilities. After completing this course, you will be able to explain the importance of wearing Personal Protective Equipment (PPE) Identify PPE Responsibilities: management to select PPE appropriately to task and to require its use, employees to use selected PPE consistently and correctly Identify some of the uses and limitations of protection provided by specific types of PPE focusing on common examples of eye/face, head, body, foot, and hand protection. Explain the importance of assuring good fit and how to inspect, clean, and maintain PPE Additional topics include: Introduction to PPE, PPE Responsibilities, Hand Protection, Body Protection, Eye & Face Protection, Head Protection, Protective Footwear, Other Kinds of PPE

Participants: Employees who are new to a company or who need a refresher in Personal Protective Equipment training.

Online exam upon completion of course.

Course Descriptions

Bloodborne Pathogens Training 29 CFR 1910.1030

Single Registration: \$50.00 (Group discounts for 3 or more people)

Online Duration: 1 Hour

Prerequisites: None

Course Overview: The ever increasing risk of the transmission of bloodborne diseases in today's workplace has facilitated the necessity for training employees such as housekeepers, lab tech, nurses, physicians, maintenance personnel or any other employee who may come in contact with infectious materials, blood or bloodborne diseases. This training includes information on the prevention, transmission and recording of occupational exposure to bloodborne pathogens. It includes information intended for all employees that are at risk for accidental exposure.

Online exam upon completion of course

Fall Protection

Single Registration: \$60.00 (Group discounts for 3 or more people)

Online Duration: 3 Hours

Prerequisites: None

Course Overview: Working safely at elevations can be a matter of life or death. Falls are the 4th leading cause of workplace fatalities in general industry. This course we enable you to identify hazards associated with working at heights or on a roof, and introduce you to the procedures in case of an emergency. After completing this course, you will be able to: Know when and how to use fall protection equipment such as fall restraint and fall arrest systems

- Identify the hazards associated with elevating work equipment
- Identify the hazards associated with working on a roof
- Additional topics are included: Following procedures in case of an emergency, Training, Pre-Job Planning, Fall Restraint and Arrest Systems, Inspecting Fall Protection Equipment, Anatomy of a Fall, Elevated Work , Environmental Hazards, Pre-Job Planning Revisited, and Emergency Situations.

Participants: Workers that are required to be working above a height of 4 feet need to be aware of fall hazards and fall protection in order to prevent serious injury.

Online exam upon completion of course.

Confined Space Entry Training as per 29 CFR 1910.140

Single Registration: \$195.00 (Group discounts for 3 or more people)

Online Duration: 3 Hours

Prerequisites: None

Course Overview: The Confined Space Entry training course will allow the entrant, attendant, or supervisor to safely and confidently understand and evaluate the hazards and procedures associated with confined spaces. This training will help you to differentiate between a Permit- Required confined space and a Non-Permit-Required confined space. The course will address the hazards associated with confined spaces and it will outline the duties and responsibilities of all members of a confined space entry team, emergency rescue procedures, and plan development. In addition to confined space entry procedures and hazards, this course will discuss the need for appropriate personal protective equipment and the selection characteristics for each level of protection. Because the use of instrumentation for monitoring is also essential to any confined space operation, the instruction will address numerous types of direct-reading instruments, including their mode of operation and limitations of each type.

Course Descriptions

8 Hour HAZWOPER Site Supervisor Training Annual Refresher 29 CFR 1910.120(e)

Single Registration: \$150.00 (Group discounts for 3 or more people)

Online Duration: 8 Hours

Prerequisites: OSHA 24 hour or 40 hour HAZWOPER training

Course Overview: A new understanding of safety is required at all levels of management from the CEO to the line supervisor. Safety performance is included as part of a site supervisor's overall job evaluation. This on-line course is designed for Site Supervisors and others who manage hazardous material site workers. This information will provide supervisors and managers specific information in order to properly supervise workers, remediate investigations, and oversee other site activities. This training meets the requirements outlined in paragraph "e" of 29 CFR 1910.120.

Online exam upon completion of course.

Lockout/Tagout 29 CFR §1910.147

Single Registration: \$125.00 (Group discounts for 3 or more people)

Online Duration: 3 Hours

Prerequisites: None

Course Overview: This course describes the features and implementation of OSHA's Control of Hazardous Energy standard (29 CFR §1910.147). The material is intended for all "affected workers" and provides the essential information for "authorized workers" to safely perform work on both electrical and non-electrical (moving/rotating, hydraulic, pneumatic, chemical, or thermal) energy sources. Upon completing this course, you will be able to:

- Identify the main types of hazardous energy and recognize which ones apply to you.
- Describe the purpose of a lockout/tagout program. Define the responsibilities of the individuals that are affected by a lockout/tagout program.
- Apply methods and procedures involved in an effective lockout/tagout program.

Additional topics include: Types of hazardous energy, regulatory requirements, definition of lockout/tagout and when it applies, individual responsibilities and procedures.

Participants: Primary audience is affected workers: those who operate or work in the area of equipment on which service or maintenance is being performed under lockout/tagout. Secondary audience is authorized workers: those who perform maintenance and repair activities and need to practice lockout/tagout procedures.

Online exam upon completion of course.

HAZWOPER First Responder Awareness Annual Refresher 29 CFR 1910.120(q)

Single Registration: \$85.00 (Group discounts for 3 or more people)

Online Duration: 4 Hours

Prerequisites: None

Course Overview: In compliance with the Occupational Safety and Health Administration (OSHA) regulation, this 4-hour first responder awareness level training is to certify individuals who will be involved with Hazardous Waste Operations and Emergency Response (HAZWOPER). This training is for individuals who respond to releases or potential releases of hazardous substances as part of the initial response to the site for the purpose of protecting nearby persons, property, or the environment from the effects of the release. They are trained to notify appropriate organizations without actually trying to stop the release. Their sole function is to notify organizations or appropriate personnel at their facility of a hazardous material spill or release. First responder awareness level personnel shall have received at least four hours of training.

Online exam upon completion of course.

Lead Awareness for General Industry 29 CFR 1910.1025

Single Registration: \$50.00 (Group discounts for 3 or more people)

Online Duration: 2 Hours

Prerequisites: None

Course Overview: In compliance with the Occupational Safety and Health Administration (OSHA) 29 CFR 1910.1025 regulations, this awareness-level initial or refresher course is designed for personnel who are required to work around lead or lead-containing materials but who do not perform lead-based paint abatement work. The regulation applies to any work where personnel may be exposed to lead or lead-containing materials during the course of their work duties.

Online exam upon completion of course

Laboratory Safety 29 CFR 1910.1450

Single Registration: \$45.00 (Group discounts for 3 or more people)

Online Duration: 1 Hour

Prerequisites: None

Course Overview: This course, designed for research laboratory personnel, examines workplace safety in laboratory environments, including health hazards, exposures, physical hazards, hazard recognition, exposure controls, and emergency procedures. Since many laboratory personnel use biological materials in addition to chemicals, the course includes optional sections on biological hazards.

The course does not cover radioactive isotopes or equipment.

- Assist in complying with the training requirements of 29 CFR 1910.1450
 - Understand the physical and health hazards of materials commonly used in laboratories
 - Understand methods and observations that may be used to detect the presence or release of a hazardous material.
- Additional topics include: Understand exposure control measures, Introduction, Health Hazards, Exposures, Physical Hazards, Hazard Recognition, Exposure Control, Emergency Procedures, and Summary and Conclusion.

Participants: Research laboratory personnel

Online exam upon completion of course.

Lead Awareness for Construction 29 CFR 1926.62

Single Registration: \$50.00 (Group discounts for 3 or more people)

Online Duration: 2 Hours

Prerequisites: None

Course Overview: In compliance with the Occupational Safety and Health Administration (OSHA) 29 CFR 1926.62 regulations, this awareness-level initial or refresher course is designed for personnel who are required to work around lead or lead-containing materials but who do not perform lead-based paint abatement work. The regulation applies to any work where personnel may be exposed to lead or lead-containing materials during the course of their work duties.

8-Hour HAZWOPER First Responder Operations Annual Refresher 29 CFR 1910.120(q)

Single Registration: \$150.00 (Group discounts for 3 or more people)

Online Duration: 8 Hours

Prerequisites: None

Course Overview: In compliance with the Occupational Safety and Health Administration (OSHA) regulation, this 8-hour first responder operations level training is to certify individuals who will be involved with Hazardous Waste Operations and Emergency Response (HAZWOPER). First responders at the operations level are individuals who respond to releases or potential releases of hazardous substances as part of the initial response to the site for the purpose of protecting nearby persons, property, or the environment from the effects of the release. They are trained to respond in a defensive fashion without actually trying to stop the release. Their function is to contain the release from a safe distance, keep it from spreading, and prevent exposures. First responders at the operational level shall have received at least eight hours of training.

Specifically, here are the regulatory citations from 29 Code of Federal Regulations (CFR) 1910.120 section q.

- 1910.120(q)(6)(ii)(A) Knowledge of the basic hazard and risk assessment techniques.
- 1910.120(q)(6)(ii)(B) Know how to select and use proper personal protective equipment provided to the first responder operational level.
- 1910.120(q)(6)(ii)(C) An understanding of basic hazardous materials terms.
- 1910.120(q)(6)(ii)(D) Know how to perform basic control, containment and/or confinement operations within the capabilities of the resources and personal protective equipment available with their unit.
- 1910.120(q)(6)(ii)(E) Know how to implement basic decontamination procedures.
- 1910.120(q)(6)(ii)(F) An understanding of the relevant standard operating procedures and termination procedures.

Online exam upon completion of course.
