Course Features

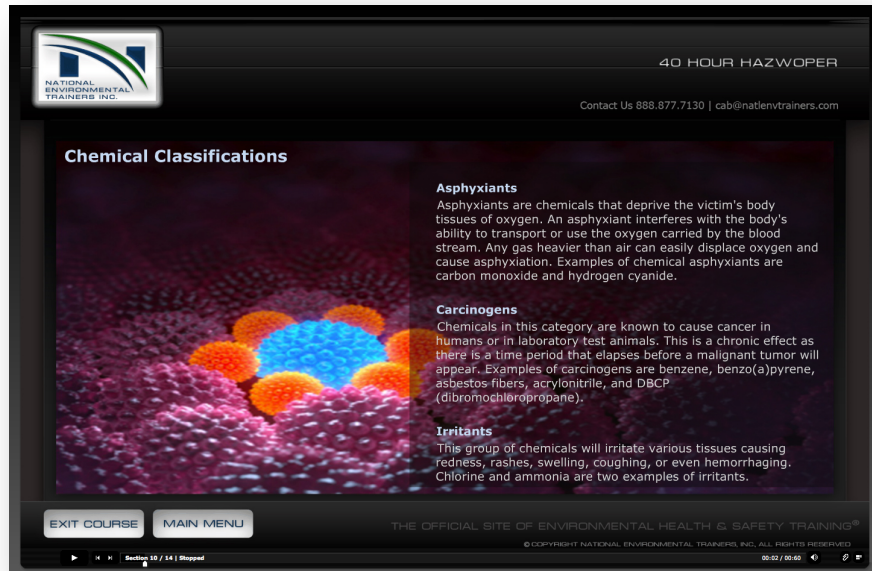

- Over 20 interactive flash animations
- 5 modules
- Award winning content - CEU's
- Self grading quizzes and final exam
- OSHA Study Timer (tracks your study time login and logout at your convenience)
- Certificate of Completion (3 certificates) e-cert, 8x10 and wallet card (instant download of e-certificate upon course completion)
 - Course access for 1 year from the time of registration
- Free registration into the National Repository® (download your certificates at anytime in the future)

Course Description

In compliance with OSHA 29 CFR 1910.1001 regulations, the Asbestos Awareness training is required for individuals having a role working with Asbestos Containing Materials (ACM) or exposure to them. This training must be provided to professionals at the start of their job assignment and annually thereafter. Attending this two-hour Asbestos Awareness Training Course does not imply that maintenance and custodial staff will be required to work with asbestos-containing materials (ACM).

The purpose of the session is to provide a basic overview of asbestos and its associated hazards in addition to satisfying the employee training requirements under OSHA regulations "Occupational Exposure to Asbestos." The scope and content of this course is limited to the information essential to this requirement. Important questions such as the ones that follow will be answered.

- What is asbestos?
- What are the health effects of exposure to asbestos?
- Where can asbestos be found?
- How to properly protect yourself?
- What are the laws governing asbestos?

Aesthetically pleasing course layout that is user friendly. Professional voice-overs, animations and high definition photographs. Self-grading quizzes and final exam.

Along the way there are self grading quizzes, interactive exercises, full length videos and a self grading final exam. The quizzes can be taken as many times as needed, and the final exam can be taken a maximum of 3 times. Once a person satisfactorily completes the course, an e-certificate is immediately sent to them via email. The original certificates (8x10 and wallet card size) arrive in the U.S. mail.

Course Overview & Objectives

In compliance with the Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.58, all maintenance, custodial, and installation workers are required to receive Asbestos Awareness Training annually. The training covers the health effects of asbestos, types, recognition of damaged or deteriorated Asbestos Containing Materials (ACM), work practice requirements to avoid disturbance of ACM and proper response to fiber release episodes. The asbestos awareness training course can be taken on-line while complying with the OSHA regulations.

Objectives

- Explain asbestos and why exposure to it is regulated.
- Explain how people are exposed to asbestos and why it is important to avoid this.
- Explain how to avoid exposure to asbestos.
- Describe OSHA regulations regarding asbestos.
- Take the asbestos awareness exam.

Support

Includes 24/7 **U.S. Based** support. An experienced and highly qualified instructor is available to you throughout the training process. Our toll free hotline or email will allow access to some of the finest instructors in the U.S.
